Global network of innovation

Looking for ...

... way of telephoning? HiPath 1220 - the telephone system with the best connection to Siemens convenient system phones.

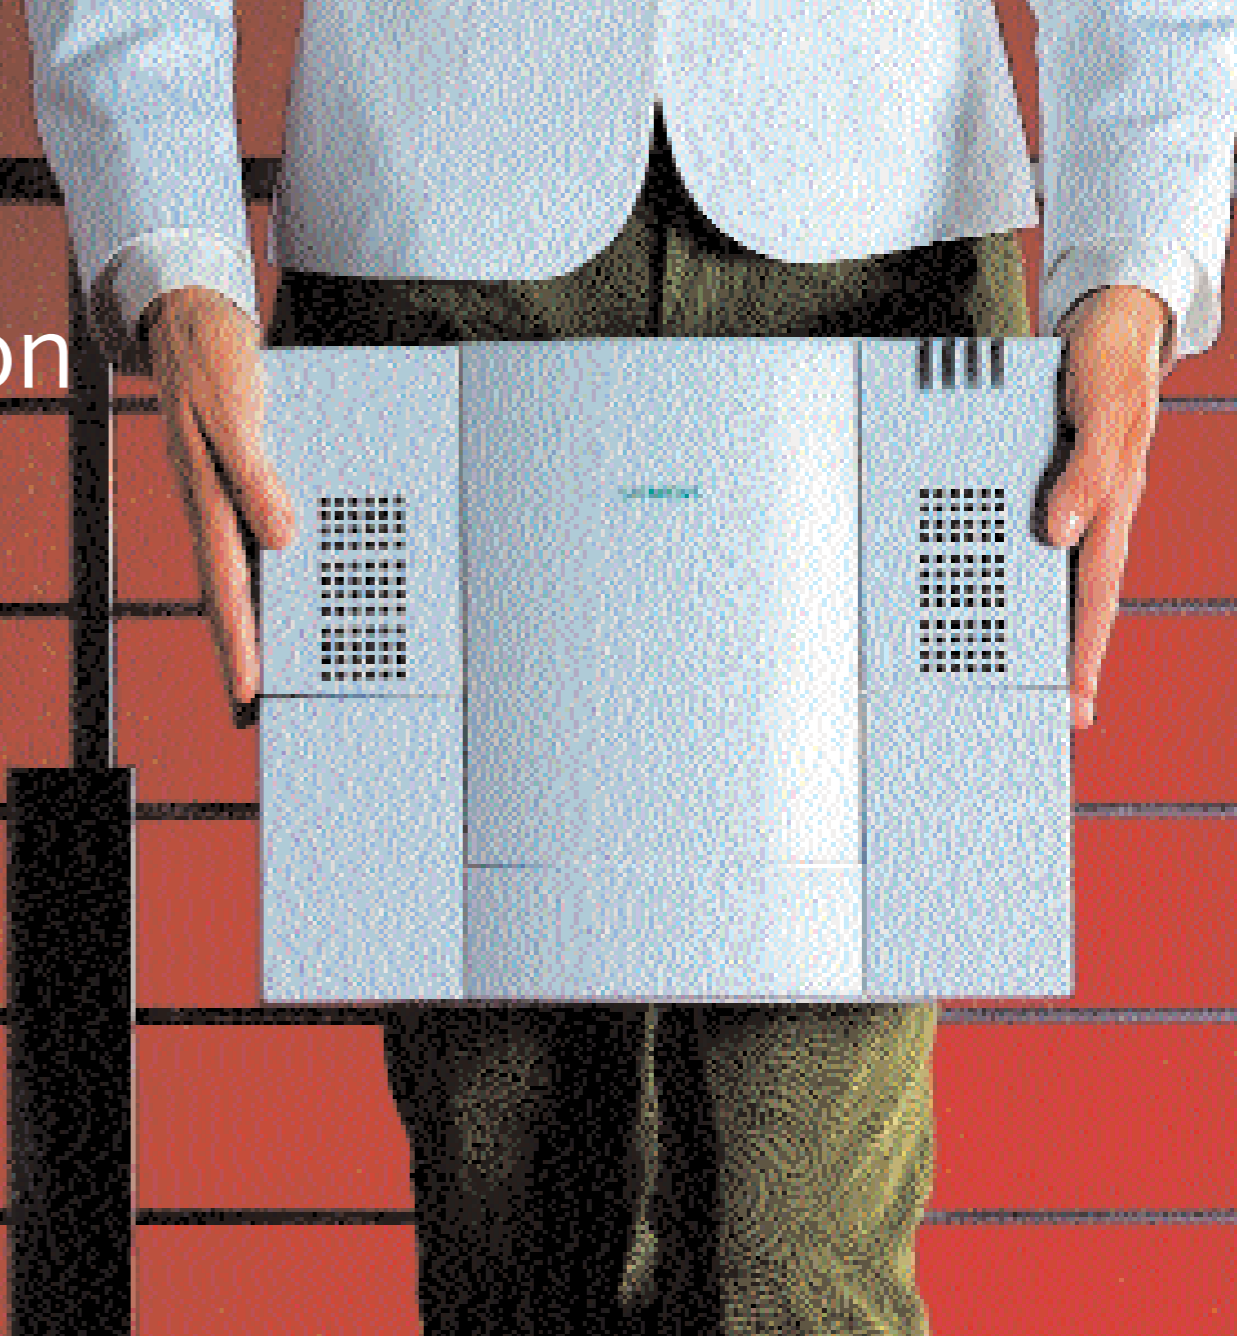

With the HiPath 1220 telephone system, Siemens offers an exceptionally high performance communications system for small, but nevertheless demanding, companies. A multitude of professional features supports all phone-based communications processes - at every workstation and in every working environment.

Particularly convenient, are features such as high-speed data transmission, thanks to the integrated USB interface; and easy-to-understand call-cost evaluation with the Account Manager. Particularly simple, are features such as system administration via PC tool. It all adds up to make telephoning more professional and more efficient.

A further benefit of many, is that HiPath 1220 offers even smaller companies access to the convenience of Siemens system phones, thus guaranteeing you reliable voice communication via high quality, user-friendly telephones. The digital system phones of the optiPoint 500 range boast an easy-to-understand and interactive user guide, large keys and a clearly readable display. Some models also incorporate a two-way hands-free function, ensuring top voice quality when phoning without using the receiver. With cordless Gigaset phones, your staff are free to move throughout the premises, while remaining fully accessible.

You want to grow - no problem. With HiPath 1220, you have the freedom to expand with ease, two-by-two, to as many as 14 phones.

Decide for a new quality in telecommunications. Decide now for HiPath 1220 - your entry ticket to the remarkable, high-performance world of Siemens telephone systems. Benefit from our extensive know-how and our many years of experience.

... a better ...

You run a medical practice, a legal practice, a small business, or you work from home? Direct contact with your customers is crucial to your success, which is why you expect far more from the perfect telephone system than simply the standard features? You want easy-to-use, convenient terminals? And all that without breaking the bank?

No problem. With HiPath 1220, Siemens brings all the features of a professional telephone system within the reach of small companies.

Completely convenient - optiPoint 500 system telephones.

HiPath 1220 opens up the whole world of Siemens system phones to you. You can select from the following optiPoint 500 digital system phones (two-channel interface U₁₂) to satisfy a wide range of demands - available in a choice of two shades, either mangan or arctic:

optiPoint 500 entry
The cost effective digital entry model with loudspeaker and 8 function keys.

optiPoint 500 basic
